

Excel Finance Shortcut Toolkit

PERSONAL.XLSB
Custom VBA macros available in every workbook

Category	Shortcut	Macro	What it does
Value tools	Alt + Shift + .	DecimalRight	Divides selected values by 10
Value tools	Alt + Shift + ,	DecimalLeft	Multiplies selected values by 10
Value tools	Ctrl + Alt + S	ToggleSigns	Flips positive values to negative and vice versa
Visual tools	Ctrl + Alt + A	AutoColor	Cycles font color: black -> blue -> green -> black
Formatting	Ctrl + Alt + 4	FormatCurrency	Applies currency format with parentheses for negatives
Formatting	Ctrl + Alt + 5	FormatPercent	Applies one-decimal percentage format
Formatting	Ctrl + Alt + 6	FormatMultiples	Applies one-decimal multiple format, such as 8.4x
Formatting	Ctrl + Alt + 7	FormatNumber	Applies whole-number format with comma separators
Formatting	Ctrl + Alt + 8	AddDashForZero	Keeps the current format but displays zero as an aligned dash
Editing	Ctrl + Alt + Q	PasteSkipBlanks	Pastes copied cells, removes blanks, and shifts remaining cells up
Decimals	Ctrl + Alt + [	DecreaseDecimals	Decreases displayed decimal places
Decimals	Ctrl + Alt +]	IncreaseDecimals	Increases displayed decimal places

New dynamic shortcut

Ctrl + Alt + 8 does not replace the current number format. It preserves currency, percent, multiples, or ordinary numbers and only changes the zero section to an aligned dash.

Examples

0.0% -> -
0.0x -> -
\$#,##0.00 -> -

Tip: save changes to PERSONAL.XLSB when closing Excel. The workbook you used to open the VBA editor does not need to be saved unless it contains its own changes.
