

VBA shortcuts

15 shortcuts for formatting, scaling and collecting numbers

START HERE Run SetCustomShortcuts to activate the keys in Excel.

Select the cells first. The sum shortcut writes to the active cell.

01 SCALE & SIGNS

Alt + Shift + .	Divide by 10 1,000 becomes 100
Alt + Shift + ,	Multiply by 10 100 becomes 1,000
Ctrl + Alt + S	Reverse the sign: positive / negative

02 FORMATTING

Ctrl + Alt + A	Font color: black > blue > green > black
Ctrl + Alt + 4	Currency \$1,234.00
Ctrl + Alt + 5	Percent 12.3%
Ctrl + Alt + 6	Multiples 5.0x
Ctrl + Alt + 7	Number 1,234
Ctrl + Alt + [	Show fewer decimal places
Ctrl + Alt +]	Show more decimal places
Ctrl + Alt + 8	Display zeros as a dash*

03 PASTE & COLLECT

Ctrl + Alt + Q	Paste, then delete blank cells and shift cells up
Alt + Shift + C	Add selected numeric values to the stored list
Alt + Shift + V	Insert =SUM(...) and clear the stored list
Alt + Shift + X	Clear the stored list without inserting a sum

COLLECT > SELECT DESTINATION > SUM

Select 100, -25 and 50; press Alt + Shift + C. Select a destination; press Alt + Shift + V to insert =SUM(100,-25,50), which returns 125.

Collect repeatedly to append more cells or ranges. Uses calculated values, not formulas, and an internal VBA list, not the Windows clipboard. Blank, text and error cells are skipped. Scaling changes values; formulas use *10^n and restore at power 0. Mixed font colors reset to black. *Dash applies to formats with 2-4 sections; General is unchanged. Format the cells first.
