

VBA shortcuts

16 shortcuts for formatting, scaling, copying and pasting

START HERE Run SetCustomShortcuts to activate the keys in Excel.
Select cells first; paste and sum start at the active cell.

01 SCALE & SIGNS

Alt + Shift + .	Divide by 10 1,000 becomes 100
Alt + Shift + ,	Multiply by 10 100 becomes 1,000
Ctrl + Alt + S	Reverse the sign: positive / negative

02 FORMATTING

Ctrl + Alt + A	Font color: black > blue > green > black
Ctrl + Alt + 4	Currency \$1,234.00
Ctrl + Alt + 5	Percent 12.3%
Ctrl + Alt + 6	Multiples 5.0x
Ctrl + Alt + 7	Number 1,234
Ctrl + Alt + [	Show fewer decimal places
Ctrl + Alt +]	Show more decimal places
Ctrl + Alt + 8	Display zeros as a dash (format cells first)

03 COPY, PASTE & COLLECT

Ctrl + Alt + Q	Paste, then delete blank cells and shift cells up
Alt + Shift + C	Copy cell values to clipboard; collect numeric values
Alt + Shift + V	Insert =SUM(...) and clear the collected list
Alt + Shift + X	Clear the collected list without inserting a sum
Alt + Shift + Z	Paste copied text lines across columns

PASTE ACROSS COLUMNS

Copy one table row, select a destination, then press Alt + Shift + Z.

Skips blank lines and removes \$ signs. Checks commas before converting numbers.

Suspicious numeric text gets a red fill; review it against the source. Clear fill manually.

Existing destination values are overwritten. Missing digits can still escape detection.

COLLECT & SUM

Alt + Shift + C appends numbers to an internal list and copies values as tab-separated text.

Alt + Shift + V uses that list, not the clipboard. Example: =SUM(100,-25,50) returns 125.
